Find the project. Forge the path.

THE JADE IDENTITY

TRAILFORGE

A clear identity for work that begins before the requirements are fully known. Source facts, buyer paths and human judgment move together.

Evidence before action.

01 / POSITIONING

The fieldwork desk

Trailforge helps commercial-power teams organize early project signals, review the evidence, map the buyer chain and prepare a customer conversation.

Who it serves

Business development, commercial-power operators and infrastructure researchers who need a clear record of what is known and what comes next.

What it stands for

Clarity. Traceability. Practical momentum. The identity feels industrial and capable, with enough warmth for a working customer relationship.

THE CUSTOMER-FIRST SEQUENCE

Discover › Review need › Map buyers › Talk › Coordinate

One mark. A consistent signature.

02 / LOGO SYSTEM

Clear space

Keep at least one quarter of the mark height clear on every side. Preserve the supplied lockup proportions.

Minimum sizes

Horizontal: 120 px / 35 mm. Icon: 24 px / 10 mm. The 16 px export is reserved for browser favicons.

KEEP IT FLAT. DO NOT STRETCH, ROTATE, RECOLOR, OUTLINE OR ADD EFFECTS.

Jade carries the identity.

03 / COLOR

Jade / Primary

#126653

Graphite / Structure

#232B26

Paper / Canvas

#F5F4EE

Mist / Surface

#EEF4EF

Mint / Highlight

#70D1AE

Brass / Detail

#B49A60

APPROVED TEXT PAIRINGS / CONTRAST RATIO

white on jade: 6.88:1

mint on graphite: 7.9:1

graphite on paper: 13.19:1

graphite on brass: 5.35:1

muted on paper: 5.6:1

Confident headings. Useful detail.

04 / TYPOGRAPHY

Manrope

Primary family for headings, body copy and interface labels. Use weight 800 for the wordmark, 700-800 for headings and 400-500 for body text.

Projects worth pursuing.

Keep source facts and open questions together.

SOURCE / OBSERVED / REVIEWED

TYPE SCALE

Display 48-72 / 1.05

H1 40 / 1.1

H2 28 / 1.2

H3 20 / 1.3

Body 16 / 1.6

Metadata 12 / 1.4

IBM Plex Mono is reserved for dates, source IDs and short technical annotations. Sentence case for prose; uppercase only for the wordmark and short section labels.

A route, a grid, a clear next step.

05 / GRAPHIC LANGUAGE & INTERFACE

Projects worth pursuing.

Use route lines as quiet depth. A glass panel belongs in a contained scene; its text always needs a stable surface.

THE NEXT RIGHT STEP

Review the source.

Open project file

Structure

4 px spacing grid. Comfortable 16 px body text. 8-12 px panel corners. 44 px minimum interaction targets. Visible focus ring and text labels for every state.

Motion & glass

Feedback: 140-200 ms. Page entry: 240-320 ms. Ambient motion: slow and subtle with a pause control. Respect reduced motion; replace glass with a solid surface when transparency is reduced.

Clear facts. Practical next steps.

06 / VOICE & MESSAGING

Direct / Grounded / Curious / Capable

Lead with the project. Name the source. Keep uncertainty explicit. Give the operator a useful action without implying that evidence is customer confirmation.

USE	AVOID
Power need is unknown. Add a reviewed source.	A high-confidence opportunity is ready.
Buyer role recorded. Decision authority remains unknown.	We found the decision maker.
Prepare a conversation brief.	Automatically close the customer.
Two sources checked. Review the candidate signals.	Every project in the market, found first.

Tagline: Find the project. Forge the path. Descriptor: Project-first power intelligence. Never promise market lead time, forecast accuracy or verified intent without supporting evidence.

Ready for the places it works.

07 / APPLICATIONS

TRAILFORGE

Project-first power intelligence

IDENTITY CARD / NO CONTACT DETAILS

Find the project.
Forge the path.

SOCIAL / CAMPAIGN TITLE

TRAILFORGE

PROJECT FIELD NOTES

A source. A question. A next step.

REPORT HEADER / DOCUMENT COVER

APP ICON / SOLID FIELD

Use the masters. Keep the meaning.

08 / HANDOFF

The kit

Outlined SVG logo masters, transparent PNG exports, app icons and favicon, route-pattern artwork, social and document templates, an offline brandbook, brand guidelines and CSS/JSON design tokens.

Implementation

Use semantic tokens for actions, surfaces, text and feedback. Preserve UNKNOWN, reviewed evidence and recorded conversation as separate meanings. Use text labels and icons in addition to color.

Type licensing

Manrope and IBM Plex Mono are distributed with their SIL Open Font License files in the kit. The logo wordmark is supplied as outlines, so recipients do not need the font installed.
